

WE'RE KEEPING STANDARDS HIGH

COSMOS (COSMetic Organic Standard) is a Europe-wide private standard the purpose of which was to set down minimum common requirements, and harmonise organic and natural cosmetic certification rules.

**COSMOS
ORGANIC**

**COSMOS
NATURAL**

COSMOS makes use of the principles in the Ecocert standard:

- Promote the use of ingredients from organic farming.
- Use production and manufacturing processes that are environmentally sound and safe for human health.
- Include and expand the concept of "green chemicals".

 Our commitment to high levels of certification mean that you can be sure of receiving the best possible organic and environment friendly manufacturing standards.
